# HOW DOES IT WORK?

You can design your pocket ashtray to look exactly how you want it.

Whether you have a logo, a text or just an idea - hit us up and we will help you design it your way.

From ordering your custom design, you will have it in 4 - 6 weeks.

You will have the standard-print within 2 - 3 days.

All ashtrays come in display boxes.

International shipping is 16 - 20 €.

# POCKET ASHTRAY

## ABOUT THE PROBLEM

8 \* 8 cm. pocket-sized container  
made by reused craft paper.

Airtight and free of smell  
due to our click-lock mechanism.

Can be washed & reused.

Quality- and fire tested in SGS  
labs.

The inside is made of aluminium,  
which kills fire from the cigarette.

### THE WORLD'S MOST COMMON TRASH

Every year more than 4,5 billion  
cigarette butts end up in nature.

That makes cigarette butts the  
most common litter item in the  
world.

And that's still without all the  
butts that land on streets and  
roads in cities across the world,  
costing local governments  
many millions dollars in  
cleaning every year.

### BUTTS BECOME ANIMAL FOOD

Studies show that many  
animals: Birds, fish and  
smaller insects can't tell  
cigarette butts from their  
diet.

Due to the combination of  
microplast and toxic  
chemicals from the tobacco  
most animals either die or  
get seriously ill after eating a  
cigarette butt.
